3D Modelling & Visual Effects

Technical Club Recruitment Task: 3D Modelling & Visual Effects

1. OBJECTIVE

Create a unique and creative 3D design based on any concept of your choice: objects, environments, characters, futuristic concepts or imaginative scenes. The focus is on creativity, visual presentation, materials, lighting and bringing your imagination to life.

2. CHOOSE YOUR APPROACH (ANY ONE)

Category	Details
A. 3D Modelling (Blender / Maya)	Create a 3D model or scene for your concept. Focus on modelling, materials, textures, lighting and rendering.
B. 3D Animation (Spline)	Create a 3D animation of your concept. Experiment with motion, transitions, camera movements and interactive elements.
C. 3D Web Development (Three.js)	Create a webpage featuring your 3D design. Explore interactive objects, camera controls, animations and other creative features.
D. AI-Assisted 3D Workflow	Explore AI tools, agents, prompt engineering and prompt chaining to bring your concept to life. You may also try AI-assisted workflows in Blender.

3. DESIGN REQUIREMENTS

- Create an original design based on any concept of your choice.
- Focus on creativity, detailing and visual appeal.
- Use suitable materials, textures, lighting and colours.
- Incorporate animation or interactivity wherever relevant.
- Ensure the final output reflects your own ideas and effort.

4. TOOLS & RESOURCES

- You may use Blender, Maya, Spline, Three.js or other suitable tools.
- Free textures, HDRIs, documentation and online tutorials are allowed.
- AI tools may be used for concept development, prompting and assisting your workflow.
- You must understand your project and be able to explain how you created it.

5. SUBMISSION

- Project submission is **not mandatory**, but you are encouraged to complete your work and prepare a **video walkthrough** of your final output and creative process.
- If you have a project or video, **bring it with you on your interview date** to demonstrate your work.

6. INTERVIEW REQUIREMENTS

- **Bringing the device you used to create your project is compulsory**: your laptop or the relevant device you worked on.
- Be prepared to open and demonstrate your project and explain the tools, techniques and workflow used.
- If the project is incomplete or the video is not made, you may still attend and discuss your approach or show the work completed so far.

Explore. Experiment. Create. Bring your imagination to life in 3D!
